

# ConClip for High-quality Passive House Construction

The Passive House is the leading European building technology and constitutes the fastest growing energy performance standard in the world with 30,000 buildings realised to date. Passive houses save energy costs, are environmentally friendly and provide exceptional health benefits for the occupants. Notwithstanding the success of the Passive House, the new building technology is confronted with 3 serious challenges which need to be faced:

## Passive House Construction Quality

Due to the newness of the technological solutions implemented in Passive House construction, construction defects are on the rise in the construction and finishing of Passive Houses. **ConClip** pinpoints the key construction issues in Passive House construction and delivers on-the-spot solutions by specifying the execution details of the relevant Passive House construction elements.

## Craftsmen and Site Supervisors Training

A second challenge is the lack of trained craftsmen and site supervisors trained in proper passive house construction. **ConClip** provides immediate and easy access via mobile phone to construction know-how for craftsmen and site supervisors by means of a series of short, multi-lingual educational video clips (ConClips)

## One European quality standard

A third challenge for the Passive House are the different levels of quality standards for Passive House construction in Europe. **ConClip** brings the expertise of ten European building organisations to a single focus by offering a format that can be internationally implemented by vocational training and further education institutions throughout Europe and accessed in 8 different languages through the ConClip website without additional costs.

This project has been funded with support from the European Commission. This publication [communication] reflects the views only of the author, and the Commission cannot be held responsible for any use which may be made of the information contained therein.

ConClip Partner

# The free Online Learning Platform for Passive House Construction

[www.conclip.eu](http://www.conclip.eu)

**ConClip gives you the added Know-how for Passive House Construction - on your Mobile!**

## Craftsmen & Site Supervisors:

**ConClip Videoclips** give you the added know-how for Passive House construction - on your mobile!

## Educators:

**ConClip Videoclips** offers you an effective new teaching approach for the training in high-quality Passive Houses!

## Building Companies:

**ConClip Videoclips** delivers a modern approach to providing new skills for craftsmen and improving the construction quality of Passive Houses!

### ConClip - A New Quality of Construction Work

The Passive House demands a new quality of construction work. ConClip pinpoints the key construction issues and delivers on-the-spot solutions for implementation.

### ConClip - New Skills for Craftsmen

Craftsmen need added skills to implement Passive House technologies. ConClip provides immediate and easy access to relevant construction know-how.

### ConClip - A Common European Approach

Passive House construction requires a common European approach. ConClip brings the expertise of ten European building organisations to a single focus.

---

## ConClip - Get Involved!

Stakeholders and actors in the building industry are invited to get involved in the **ConClip** project and profit from the initiative.

You will play an important role in reaching the aim of a European quality standard in Passive House construction.

You will receive dissemination support and are entitled to share in the use of the multi-lingual videoclips of the project.

### Potential Partners are:

- Decision makers and stakeholders in the building/construction sector
- Educators in the building/construction sector
- Interest groups for Passive Houses

## The Free Online Learning Platform for Passive House Construction

The new **ConClip Platform** [www.conclip.eu](http://www.conclip.eu) is the free online educational videoclip platform for Passive House construction. This is where you will be able to search for, select, view and download the ConClips which you need for your work.

**ConClip** is currently developing the first series of multi-lingual videoclips for the **ConClip** Platform. The first series of ConClips will be presented in Spring 2015 and released to the public. To stay informed and be the first to know when the first ConClips are made public on the platform just sign up for our newsletter at [www.conclip.eu](http://www.conclip.eu) !

Please contact **ConClip** directly via [www.conclip.eu](http://www.conclip.eu) or fill out the form below. We will get back to you promptly:
